

REFERENCE 2

The Science Curriculum

R 2

Achievement Standards	
Australia	Achievement standards are a set of learning outcomes.
Belgium (Flemish)	Achievement standards are a set of final learning objectives for A stream and developmental objectives for B stream. Standards meet the needs of the grade, received for promotion, or be modified to an earlier class.
Bulgaria	The curriculum does not incorporate achievement standards.
Canada	Achievement standards are prescribed learning outcomes that are expected to be met by all students or contained in the curriculum framework.
Chile	There are no performance standards; there are objectives that students should learn. The required curriculum will include performance standards that are expected learning outcomes.
Chinese Taipei	The curriculum does not incorporate achievement standards.
Cyprus	The curriculum does not incorporate achievement standards.
Czech Republic	The curriculum provides a description of the skills and knowledge that students have. Teachers decide if the student has met the curriculum standards and consider his promotion. If a student fails a subject, he must repeat the grade.
England	Achievement standards are established at the level of each level, each level is a description of performance. On average, a grade 7 student is expected to be able to do 2; a grade 11 level 4; and a grade 13 level 5/6. One level is regarded as a year's progress.
Finland	The curriculum does not incorporate achievement standards.
Hong Kong, SAR	The curriculum does not incorporate achievement standards.
Hungary	Standards are a set of learning objectives.
Indonesia	There are instructional objectives in the curriculum but no performance standards.
Iran, Islamic Rep.	The curriculum does not incorporate achievement standards.
Israel	The curriculum does not incorporate achievement standards.
Italy	The curriculum does not incorporate achievement standards.
Japan	Achievement standards are a set of national curriculum learning objectives, such as "To help students" or "To enable students".
Jordan	Objectives are defined in the curriculum and the minimum percent of attainment for each objective is specified.
Korea, Rep. of	Achievement standards will be included in the required curriculum (to be implemented at the 8th grade in 2001).
Latvia (LSS)	The curriculum incorporates achievement standards.
Lithuania	Achievement standards are not a part of the curriculum, but are prepared as separate documents. The draft of the National Educational Standards was released in 1997. As of 1999, the document had not been officially approved.
Macedonia, Rep. of	In physics and geography achievement standards are a set of the complex or knowledge and skills which should be attained by all students. In biology and chemistry achievement standards are a set of learning objectives.
Malaysia	Achievement standards are a set of scientific skills in the curriculum content specification document.
Moldova	The curriculum incorporates achievement standards.
Morocco	The curriculum does not incorporate achievement standards.
Netherlands	Achievement standards are a set of learning objectives, such as "Students develop competence" or "Students learn to research".
New Zealand	Achievement standards are a set of learning outcomes, expressed as eight levels of learning independent of age and grade.
Philippines	Achievement standards are a set of learning competencies.
Romania	The achievement standards are a set of learning objectives, such as "The student should be able to arrive at a conclusion based on".
Russian Federation	Achievement standards are a set of knowledge and skills which should be attained by students by the end of basic school.
Singapore	
Slovak Republic	Learning objectives are included in the curriculum. Performance standards are in development.
Slovenia	
South Africa	The standards are not specific. A list of content to be covered is provided.
Thailand	Achievement standards are a set of learning objectives.
Tunisia	Achievement standards are a set of learning objectives.
Turkey	Achievement standards are a set of objectives, such as "Ability to understand/know".
United States	For each state, the standards, indicators or benchmarks are included.

Australia	45 (4.5)	34 (3.6)	50 (4.5)	42 (4.3)	18 (3.0)
Belgium (Flemish)	57 (4.4)	11 (2.1)	19 (3.1)	37 (4.4)	58 (3.9)

Japan	23 (3.7)	7 (2.4)	28 (3.2)	58 (4.5)	4 (1.8)
Jordan	68 (4.2)	34 (4.7)	73 (4.0)	85 (3.2)	1 (0.0)
Korea, Rep. of	247	7 28.6((4.9)) T /F5 1 Tf6.4286 0		37 28.6((4.9)) T /F5 1 Tf6.4286 0 11624/F5	

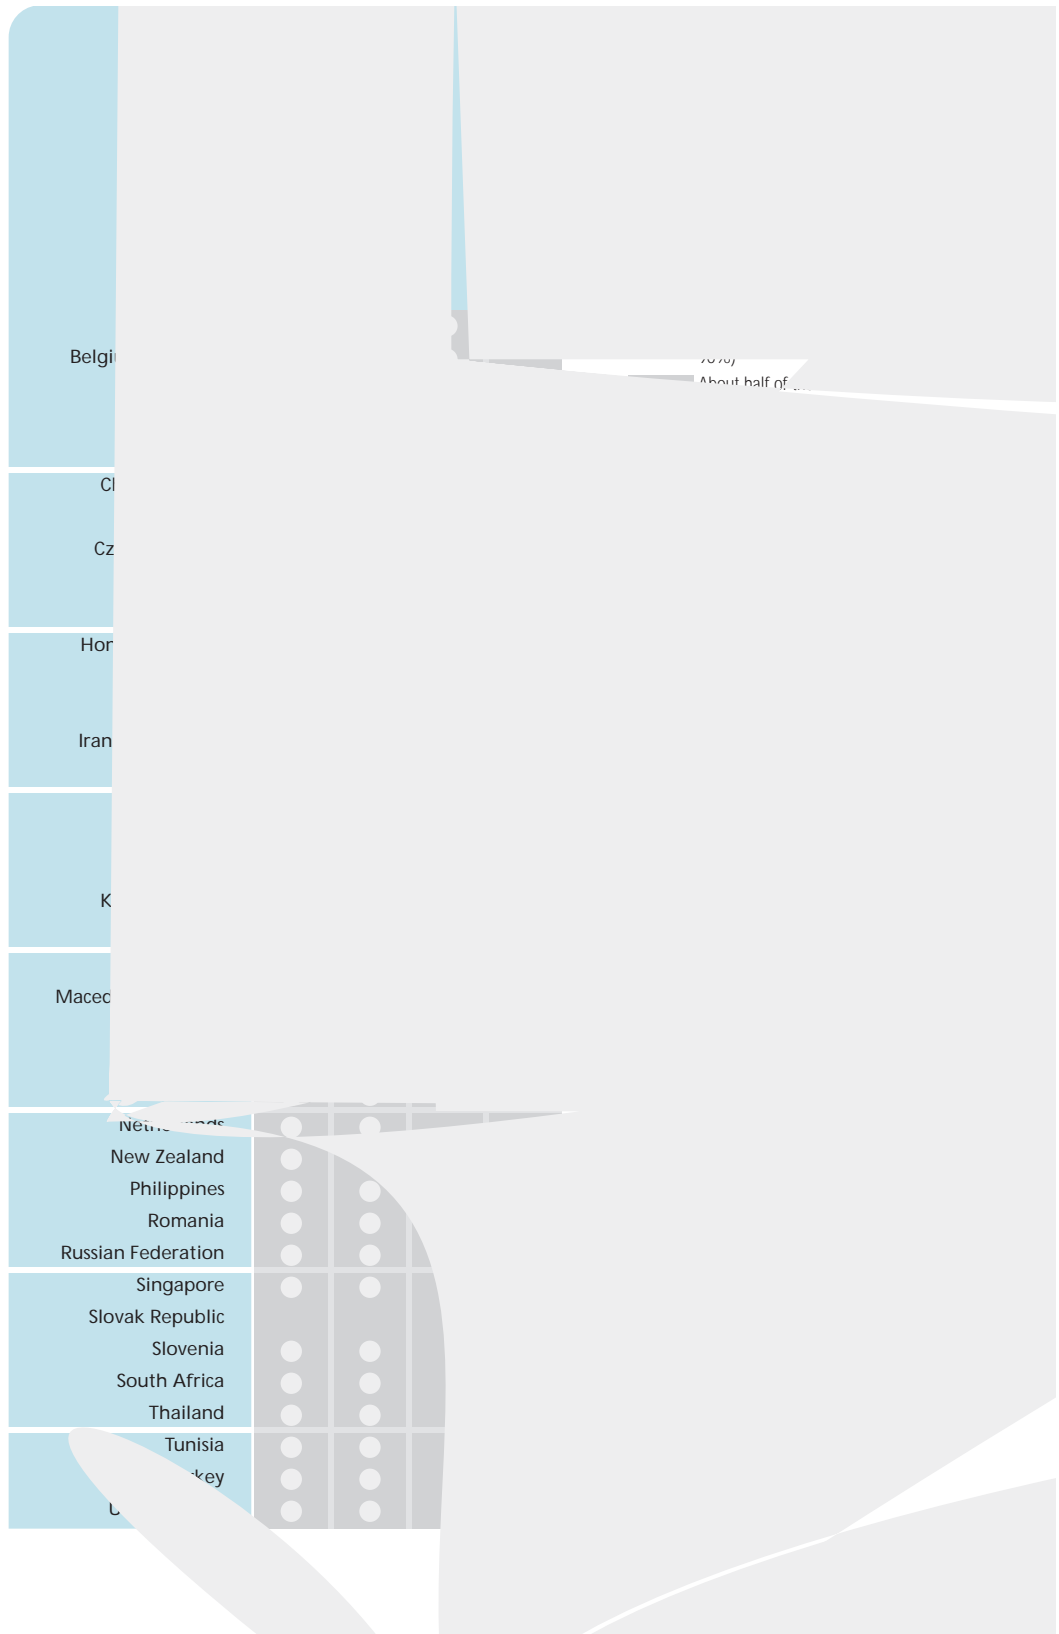

Background data provided by schools.

† Lithuania tested the same cohort of students as other countries, but later in 1999, at the beginning of the next school year.

() Standard errors appear in parentheses. Because results are rounded to the nearest whole number, some totals may appear inconsistent.

A dash (-) indicates data are not available.

An "r" indicates school response data available for 70-84% of students. An "s" indicates school response data available for 50-69% of students. An "x" indicates school response data available for <50% of students.

Background data provided by National Research Coordinators.

Background data provided by teachers.

* Categories of topic coverage for earth science are based on combined responses to questions about the individual science subtopics in the content area described in exhibit 5.12.

¹ For each topic in exhibit 5.12, teachers were asked if the topic was taught before this year, taught 1-5 periods this year, taught more than 5 periods this year, or not yet taught. Topics taught during this year, regardless if taught before this year, are included in this category.

² Data for grade 9 earth science teachers not available.

[†] Lithuania tested the same cohort of students as other countries, but later in 1999, at the beginning of the next school year.

Science teacher background data for Slovak Republic and Slovenia are unavailable.

() Standard errors appear in parentheses. Because results are rounded to the nearest whole number, some totals may appear inconsistent.

A dash (-) indicates data are not available.

An "*" indicates teacher response data available for 70-84% of students. An "s" indicates teacher response data available for 50-69% of students. An "x" indicates teacher response data available for <50% of students.
